PROFESSIONAL SUMMARY

Workday Adaptive Planning Developer with experience in planning model maintenance, master data management, data loaders, data validation. Proficient in SQL, Python, Power BI, and Tableau. Strong foundation in data analytics with expertise in dashboard development, business reporting, and transforming raw data into actionable insights through professional experience, projects, and internships.

WORK EXPERIENCE

Prais IT Solutions (Client: Genpact), Workday Adaptive Planning APR 2026 – Present

- Configured and maintained Workday Adaptive Planning models by managing dimensions, master data, and data loaders.
- Performed data validation, reconciliation, and issue resolution to ensure data accuracy and consistency across planning models.
- Collaborated with team members to maintain planning models, implement data updates, and support reporting activities.

Infosys Springboard, Data Visualization Internship OCT 2024 – DEC 2024

- Developed an interactive Power BI dashboard analyzing economic metrics across 15 Indian cities to support data-driven insights.
- Implemented dynamic filters (year, city) to enhance dashboard usability and improve stakeholder interaction.
- Conducted time-series analysis to identify trends, highlighting a reduction in youth unemployment rates from 10.2% (2020) to 9.3% (2023).

SmartInternz, Data Analytics Externship AUG 2023 – NOV 2023

- Built interactive dashboards and visual reports using IBM Cognos and Tableau to analyze business datasets.
- Wrote and executed SQL queries (MySQL) for data extraction, cleaning, and analysis.
- Transformed raw data into actionable insights to support business reporting and decision-making.

SKILLS

Workday Adaptive Planning: Model Maintenance, Master Data, Dimensions, Data Loaders, Data Validation

Programming & Databases: Python, SQL (MySQL, PostgreSQL)

Data Visualization & BI: Power BI, Tableau, IBM Cognos, Microsoft Excel

Analytics: KPI Analysis, Dashboard Development, Reporting, A/B Testing, Data Cleaning

Web Technologies: HTML, CSS, JavaScript, React

PROJECTS

Loan Portfolio Performance Dashboard (GitHub)

- Built an interactive Power BI dashboard analyzing a \$43.6M portfolio (38.5K loans) to track repayment behaviour, portfolio performance, and credit risk.
- Developed key financial and risk KPIs including Principal Repayment Efficiency (92%), Net Profit (2.1%), and Loss Given Default (43%) to assess portfolio health and risk exposure.
- Performed borrower segmentation and time-series analysis to identify high-risk segments, recovery gaps, enabling data-driven lending and risk mitigation strategies.

Enhanced Digital Marketing Campaigns Through A/B Testing (GitHub)

- Designed an A/B testing analytics dashboard to compare campaign performance across 5M impressions, 33K clicks, 64K add-to-cart actions, and 31K purchases.
- Analyzed \$144K campaign spend and calculated Cost per Purchase (\$4.67) to evaluate cost efficiency and conversion performance.
- Performed KPI comparison and trend analysis, identifying that the Control campaign achieved higher purchase efficiency and broader reach, leading to actionable recommendations for budget optimization.

Sales and Profit Analysis of Supermarket Dashboard Using Power BI (GitHub)

- Developed an interactive Power BI dashboard analyzing \$12.6M in sales and \$1.47M in profit to evaluate regional and category performance.
- Performed sales and profit trend analysis to identify key revenue drivers and margin variations across markets.
- Identified Technology as the highest profit contributor (45%), APAC as the leading revenue market (\$3.59M), providing insights for strategic growth and profitability improvement.

- Additional BI Projects:** Developed dashboards across e-commerce, HR, and streaming datasets, focused on KPI tracking, user behavior analysis, and performance reporting.

EDUCATION

BACHELOR'S OF TECHNOLOGY – COMPUTER SCIENCE WITH SPECIALIZATION IN DATA ANALYTICS AUG 2021 – NOV 2025
Vellore Institute of Technology AP CGPA: 8.24

BOARD OF INTERMEDIATE EDUCATION JUN 2019 – MAY 2021
Narayana Junior College Percentile: 79%

BOARD OF SECONDARY EDUCATION JUN 2018 – MAR 2019
Narayana Concept School CGPA: 8.7

CERTIFICATIONS

- NXT Wave:** Introduction to Databases (Link)
- TechTip24:** Trained in Data and Business Analytics (Link)
- Infosys Springboard:** Data Analytics Internship (Link)
